

JSTOR Access in Prison Initiative

Windows Installation Guide

1. Copy the JSTOR folder (along with all its contents) and the start.bat file to your Windows device.
2. When the copy is complete, eject the thumb drive and remove it.
3. Double click the start.bat file on your Windows device.
4. You should see a terminal window open and fill with text. After a minute or so, another terminal window will open. At that point, you should be able to open a browser and visit localhost:1323.
5. That's it! Now you're ready to use JSTOR!
